INTRESO and LEONARDO join forces in “Lean & Green“ partnership

Combined expertise opens additional market potentials

Buonas, Switzerland, August 3, 2011 – For medium sized manufacturing companies the reduction of energy costs plays an ever increasing role in their overall business context. This opens an attractive window of market opportunities to Intreso GmbH (Walldorf/D), a subsidiary of venture capital company MAC Capital AG (Buonas/CH) and provider of customized energy solutions based on renewable energies and sustainable raw materials. Together with the consultancy group Leonardo-Group (Munich/D), the Intreso experts will offer intelligent energy optimization concepts and processes through their new joint venture “Lean & Green“.

A first order has already been placed by a German industry customer. In the context of this order Intreso has delivered a detailed plan for reducing energy costs at the medium-sized automotive supplier Heyform GmbH. After a customized analysis Intreso has identified and defined major saving opportunities. An order has been placed for converting this detailed plan into an operator model. The order amount for Heyform GmbH alone is expected to amount to approx. 1 million Euro.

Intreso focuses on photovoltaics, solar thermal energy and solar cooling, as well as waste management and “waste to energy“. Among the company’s customers are municipal institutions, hospitals, hotels, associations, as well as industry, construction and infrastructural customers. To them Intreso offers customized energy solutions on the basis of renewable energies and sustainable raw materials. If requested, all plant systems will also be financed, operated and serviced via Intreso. In operator status and/or contracting energy cost savings of up to 20 are achieved. Additional orders are currently in preparation via the cooperation with Leonardo-Group.

About MAC Capital AG:

MAC Capital AG is a venture capital company with headquarters in Buonas, Switzerland. The company invests primarily in green technologies and renewable energies. Additional areas of investment of MAC Capital AG are commodities and other relevant markets of opportunity. MAC Capital AG generates yields through profit transfer agreements of the stock company, dividend payouts of venture capital companies and similar yields.
