High Return Prospects for Photovoltaics in Italy

Buonas, 17th December 2010 – The high return prospects for photovoltaics in Italy have caused the Intreso GmbH, a subsidiary of MAC Capital AG, to move to Italy investments planned for a plant in Germany. Along with the higher compensation for feeding into the grid, the advantages of the considerably higher solar radiation are utilized.

The Intreso GmbH uses the change in requirements for photovoltaics in France to give impulse to the projects in Bulgaria, Italy and the USA. Currently there are approximately 40 MW of power in Bulgaria being prepared for the final permits. The associated projects are already completely developed. In Italy there are 50 MW ready for implementation in 2011. The US project company reports the project development in New Mexico on an already defined plot. The power to be installed in the US is specified at 120 MW. The total investment will exceed 550 million euros.

About the MAC Capital AG:

MAC Capital AG is a venture capital and project development company with headquarters in Buonas, Switzerland. It invests primarily in the areas of green technology and renewable energy. Other areas of investment of MAC Capital AG are selected tangible assets in the commodities sector, as well as other opening markets of opportunity.
